TRAINING FOR TO-DAY.

How to Develop the Minds of Children Major-General F , whose son was child during the civil war, found on

his return home that the boy had been trained by his mother according to the his rectained by his mother according to the highest code of military ethics. The little fellow usually were the uniform of a Lieutenant. But when he was greedy, or unruthful, or ruse to a servant, his uniform was taken off and he was forced to go back to the clothes of civilian boys.

"You are not fit to go into the service of your country," he was told.

STORAGE OF APPLES.

A Few Points About Keeping Fruit Doring the Winter. There are but a very few points to during the winter. The critical time is not in the winter, but before the cold weather sets in. In the first place, the apples should be picked before they are perfectly ripe—about the time they begin to ripen is the best. Picked at that time, carofully sorted and put in barrels, they can be left in the orchard under a shed, or covered with boards and straw, until the weather begins to get quite cool. Then they are carefully sorted and removed to a dry, cold cellar, or, as many must do, placed underground in a dry, well-drained focation. They are, however, not covered in the pits very deeply at
